

MARKAL®

SECURITY CHECK

PAINT MARKER

Security Check Paint Marker Original provides a convenient visual method for identification of vibratory loosening or tampering in nuts, bolts, fasteners, and assemblies. High visibility paint mark becomes a hard film that breaks easily. Ideal for quality control and warranty work. Safe on most surfaces, adheres perfectly to metal. Safe for the user, doesn't contain Xylene.

2 cm

5 cm

FEATURES

- High visibility paint for a fast and easy visual check: security indicator or tamper-evident seal on assemblies facilitating detection of any accidental or malicious adjustment movement
- Paint free of heavy metals for a safe use on metal and for the user
- Effective volume superior compared with other product on the market (50 ml paint) for a longer period of use and reduced work downtime
- Marking range: -20°C to 70°C (-4°F to 158°F)
- Mark temperature resistance:

■ 200°C	■ 175°C
■ 200°C	■ 200°C
■ 175°C	■ 200°C
■ 175°C	■ 175°C

MARKAL®

SECURITY CHECK

PAINT MARKER

SCPM's nozzle is designed to provide the possibility of various marking sizes. It also increases the precision of the marking simply by screwing the nozzle on the head of the marker. Thanks to its length (5cm), the marker's head is extended by 3 cms, offering easy access to hard-to-reach areas. The new tip comes with a built-in cap for a convenient and quick closure. An integrated retaining wire keeps the cap attached to the nozzle, so that it can't be lost and remains always at hands.

FEATURES

- Practical with its 3 levels, the nozzle can be easily cut to the desired length to meet the desired paint thickness.
- Easy to use, simply screw the nozzle on the marker's head.
- The nozzle increases the marker's head by 3 cm for effortless marking in hard-to-reach areas.
- Made of polypropylene for high resistance
