OUR HISTORY

Founded in 1952, UNILUX is a **French company** specializing in lighting and ergonomics. Bringing DAYVIA, KOS Lighting and UNILUX together within a single business unit enables HAMELIN to consolidate its expertise, broaden its offering and strengthen its presence across Europe.

Our dynamic, committed team aims to **enhance everyone's well-being** by making your workspace harmonious and welcoming, aligned with **your expectations and those of your colleagues**.

1952

French company founded in the southern suburbs of Paris as the exclusive distributor in France for **LEDU**, a Norwegian lighting brand.

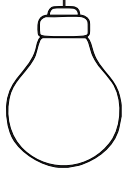

1973

Over the past 25 years, **UNILUX** has become a benchmark in the lighting sector in France and across Europe.

2000

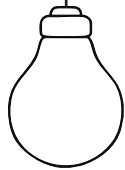

UNILUX joined the French group HAMELIN, the European leader in stationery. **UNILUX** won a RED DOT DESIGN AWARD with the INFINITY lamp.

INNOVATION & DESIGN
ECO-DESIGN
CUSTOM
DURABILITY
ETHICS

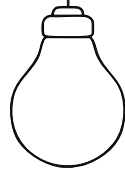

2016

UNILUX received ISO 1800 certification. The company evolved and modernized, becoming a creator of atmosphere and well-being.

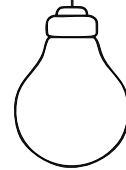

2020

Acquisition of **DAYVIA**, the French leader in light therapy. **UNILUX** expanded its expertise through the natural benefits of light on health.

2021

Merger of **Kos Lighting** with **HAMELIN** : **UNILUX** strengthened its position with office fit-out specialists and interior designers.

2022

Creation of **HAMELIN UNILUX** benefiting from the synergies between all the brands within the European HAMELIN Group.

OUR VALUES

Being **healthier and feeling better** is a philosophy that can be found in all areas of life – including the work environment. With innovative and effective products, **Unilux makes an important contribution** to greater health and well-being in the workplace.

ATTENTION

We value our brand, our team and our partner, as well as the relationships with our distributors and users.

We listen to everyone in order to constantly create new products and services. We strive to support our customers with their health and their well-being.

CREATIVITY

Innovation is at the heart of Unilux's DNA.

Our desire for permanent innovation is inspired by a “design thinking” approach and knowledge of consumer needs and working methods.

Our teams imagine and test products that will meet the needs of tomorrow for everyone in order to improve their daily well-being.

SINCERITY

We communicate complex concepts in a clear and accessible way for everyone with complete transparency.

This sincerity is present in each product from its creation to its marketing and development in order to meet the needs of our customers and the requirements of our brands.

DURABILITY

We are committed to a sustainable and responsible ethical charter.

We choose recycled/recyclable material. We develop eco designed products which are made to limit impact for the environment.

Hamelin lighting & ergonomics' aims to be always **responsible and committed**. Our products are designed to **improve the well-being and make workspaces harmonious and convivial**, in line with user expectations. Our aim is to preserve our planet for present and future generations.

OUR MISSION

Biodynamic lighting: source of well-being

- Improve your visual comfort
- Optimize your circadian cycle
- Promote your concentration

Ergonomics: innovative & adaptable

- Fight against the sedentary lifestyle by making your work space more dynamic
- Improve your well-being
- Increase your productivity

A harmonious & eco-friendly work space:

- Use recycled/recyclable materials
- Repairability & durability
- Reduced our carbon footprint by 15%

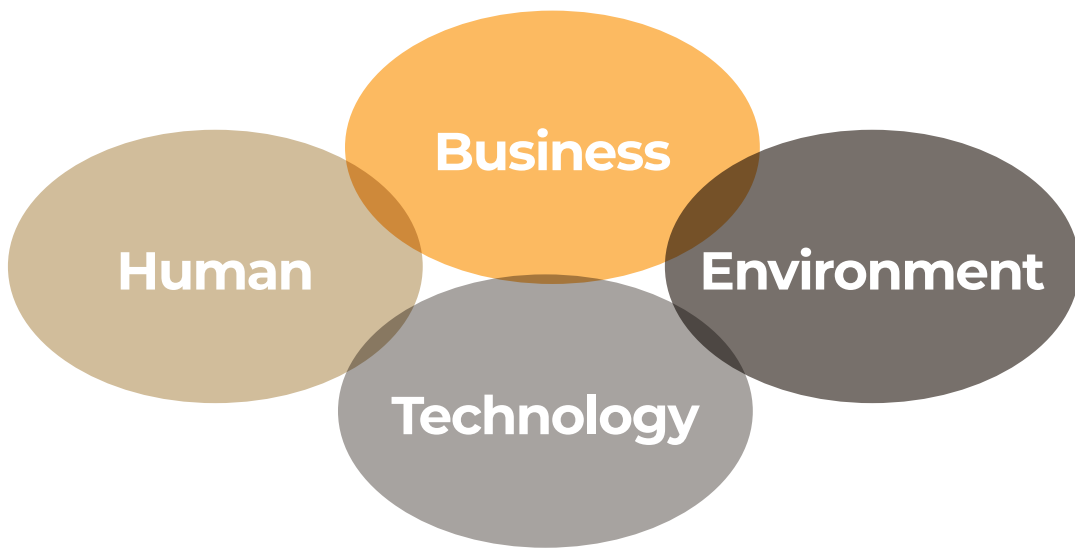

Unilux brings well-being and health to the workplace by using innovative and eco-friendly products to create an **ergonomic and harmonious workspace**.

OUR CSR APPROACH

Within the innovation approach, Unilux reconciles the needs of the user, technical feasibility and profitability by **integrating respect for the environment**.

The objective is to use the same raw materials and not to generate waste, so **our products will have a “circular” life** and will be renewable, recyclable and durable.

ECO-DESIGN THINKING

Our eco-responsible products

Preserving our natural resources is a priority. Due to this collective awareness Unilux has created in 2018, its first range based on wood from ecologically managed forests ranging from lighting to coat rack to clock. Since then Unilux uses natural and recycled materials to create environmentally friendly products.

As an actor in the lighting and office accessories sector, we energetically reduce the environmental impact of our products by reparability, durability, energy efficiency, recycling, end-of-life management and origin of raw materials.

Our certifications

Unilux is committed to an eco-responsible approach and to reducing its carbon impact. Indeed, the entire Unilux team is mobilized on environmental issues.

Sustainable development is at the heart of our strategy and our certifications prove our commitment.

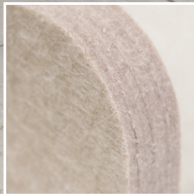

Look for our FSC®-certified products!

When choosing a material, we look for the best compromise between **performance, durability and recyclability**. At Unilux, we take great care in selecting the best materials to provide you with high quality, durable products with a unique and refined design.

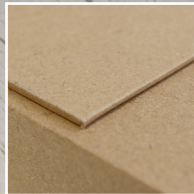

OUR MATERIALS

Recycled PP
100.000 marine animals die from getting entangled in plastic yearly.* Recycled end-of-life marine fibre waste such as used fishing nets, provides high-quality 100% recycled plastic in order to help preserve the oceans.

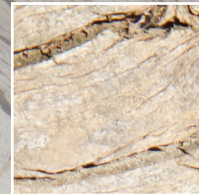

PET recycled
100 million marine animals die each year from plastic waste alone*. 100% of a PET bottle can be recycled over and over again. Converting postconsumer PET into a valuable resource helps the environment because rPET has a lower carbon footprint than virgin PET.

Carton recycled
The global consumption of paper and paperboard totaled 408 million tons in 2021. Consumption is projected to continue rising over the coming decade to reach 476 million tons by 2032.** Recycled paper and cardboard save resources and energy and preserves the environment.

Bamboo
Bamboo, known as green steel, is frequently used for its strength and abundance. It is a material that can absorb more CO2 than trees, but also releases more oxygen. Renewable and recyclable, bamboo products embody a natural and warm character.

Wood
Wood is a material with many advantages. Natural and ecological, it is durable, efficient and effective. Many companies use it for its durability and nobility. We love wood for its living and unique aspect. The wood we use comes from forests managed in an eco responsible way.

BIODYNAMIC LIGHT

"Biodynamic light" is the acronym for Human Centric Lighting (HCL), which refers to LED (biodynamic) lighting that **puts people at the center of attention**. This type of lighting promotes a person's well-being and the proper functioning of their biological rhythm.

SOURCE OF WELL-BEING

Why adopt biodynamic light in your daily life?

Natural light evolves throughout the day and changes colour:

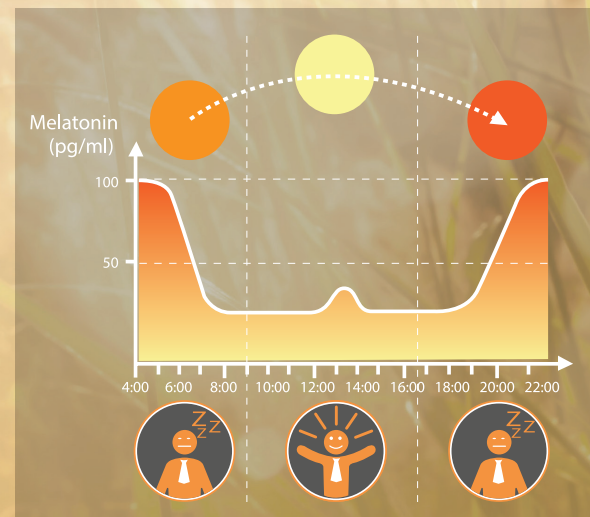

- **Sunrise: golden light**
- **Morning: white light**
- **Middle of the day: softer**
- **Sunset: yellow-orange light**

Light has a strong influence on our physical and mental behavior. It affects our concentration, our creativity and therefore our productivity. In the morning, the light is reinforced by the so-called "blue" light, which blocks the secretion of melatonin and has the effect of toning you up by boosting your concentration. Conversely, the melatonin secreted at sunset will make it easier for you to fall asleep because of the colour of the light, rich in red and orange.

Sleep disorders, mood disorders, headaches or eye strain can affect your professional life as well as your morale. In order to avoid these symptoms, the ideal is to live at the rhythm of the sun, but we spend nearly 8 hours sitting at our desk under artificial lighting.

This is why it is recommended to choose a type of lighting that suits you and your needs.

Adapting a biodynamic light that accompanies you on a daily basis will allow you to be more efficient in your projects, to be more dynamic and in a good mood. This is the reason why each individual must carefully follow his "circadian rhythm".

What is the circadian rhythm?

The circadian rhythm is a biological rhythm that affects a series of human physiological processes such as cognitive abilities, sleep/wake cycle, heart rate, mood, memory and body temperature). It is linked to the Earth's rotational movements, lasts about 24 hours and is regulated by light, which acts as a synchronizer.

Three factors influence the circadian rhythm:

- **The secretion of melatonin:** a sleep hormone, which must be secreted only at night.
- **Social life:** for people who work at night and therefore have a different circadian rhythm than natural sunlight.
- **Light:** it is important to respect the natural light cycle because humans are "programmed" to follow it.

Lack of exposure to natural light contributes to the disruption of the biological rhythm and has led to a decrease in daily sleep time of about 1 hour over the last 100 years.

On the other hand, we are in an era where we are monopolized by screens, whether in the evening or in the middle of the day; these very cold "blue" lights that disrupt our sleep are also disruptive elements of our biological clock. A desynchronized biological rhythm leads to sleep and mood disorders, poorer concentration and favors the appearance of seasonal depression. It is therefore important to respect natural light, to reproduce it as well as possible around us and to integrate it into our work environment.

OCEANIS

In 2022, Hamelin partnered with a Danish company that recycles end-of-life marine fiber waste such as used fishing nets through a unique and environmentally friendly technology.

From this 100% recycled and quality plastic, Unilux contributes to the preservation of the oceans and is part of the circular economy allowing by

- the reduction of the risk of plastic pollution in the seas
- the reduction of CO₂ emissions and
- the preservation of fossil resources.

The Unilux Oceanis range includes the JokerLED 2.0 lamp and the Chrysalis footrest. These two new products use this new material without compromising on quality and aesthetics.

1. Chrysalis footrest (p. 64)

2. JokerLED 2.0 desk lamp (p. 32)

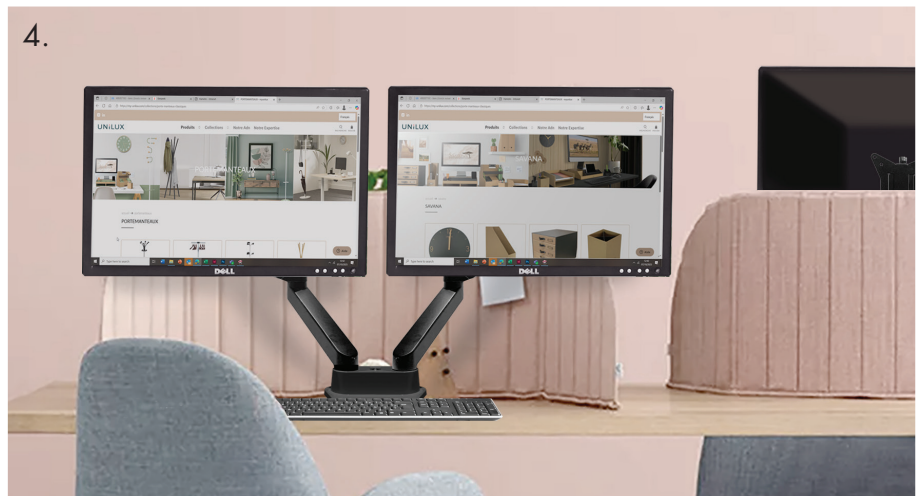

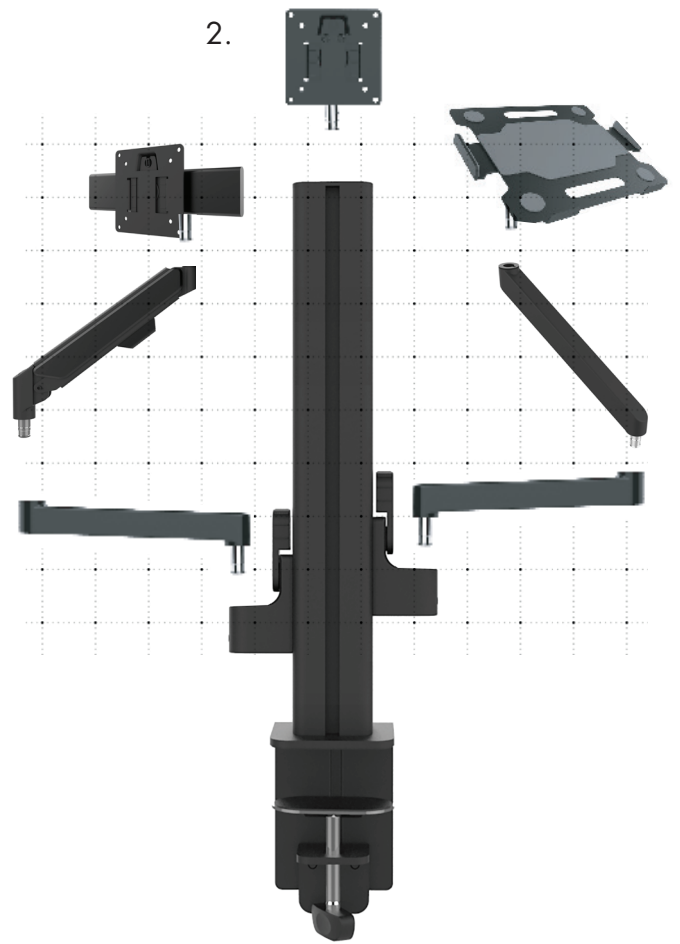

AXIO

A new generation of monitor arms.

Much more than a simple monitor arm, the AXIO range offers an innovative solution that combines the prevention of musculoskeletal disorders with the benefits of biodynamic lighting. Its central mast — the true backbone of this monitor arm system — enhances both ergonomics and overall well-being.

Tailor-made customization.

Our sliding arm supports adapt seamlessly to all work environments, delivering both flexibility and ergonomic comfort to your workspace. AXIO offers a wide range of modular components, allowing you to create dynamic configurations tailored to the needs of every user.

- 1. AXIO double mechanical arms (p. 50)
- 2. AXIO: Tailor-made customization (p. 50)
- 3. BUNDLE: Axio + Strata Lumino (p. 51)
- 4. KORO double gaz spring arm (p. 54)

BALIWEÏ

Thanks to its long fibers, bamboo is stronger and more durable than most woods. Elegant, renewable and from sustainably managed sources, this fast-growing natural material is ideal for designing aesthetic, long-lasting objects.

It is in this desire to design and offer products that are both stylish and eco-friendly that Unilux launched the Baliweï collection in 2020 using bamboo.

It is composed of a double arm architect lamp, a powerful floor lamp with 3 levels of tactile intensity variation, a 6 pegs coat rack equipped with an umbrella holder and a clock with its 100% bamboo tray with a silent movement that will be conducive to concentration in any workspace environment.

- 1. Bora Bamboo coat stand (p. 73)
- 2. Baly Bamboo Indirect uplighter (p. 42)
- 3. Baya Bamboo desk lamp (p. 28)
- 4. Palma Bamboo clock (p. 70)

SCÄNDINÄV

Looking for a simplicity in design with suits to every setting? Look no further, white and wood is the answer. This mix is very popular and the current trend. Clean lines are incorporated with understated elegance and warm functionality, which creates a very homely feel. Ideal for large interiors, such as a reception hall, as well as smaller contemporary spaces, like individual offices.

The Unilux Scändinäv range with its pure design will give character to workspaces at home or in the office. Pryska, Access, Baltic, Vicky and Aurora are the scandi-look inspired products within this range.

- 1./2. Aurora coat pegs (p. 75)
- 3. Baltic clock (p. 71)
- 4. Aurora coat stand (p. 73)
- 5. Vicky desk lamp (p. 32)

DESK LAMPS

Desk lamps are more than just light sources; they are functional companions that illuminate tasks and enhance the ambiance of the workplace. With designs ranging from sleek and modern to classic and ornate, these compact lights serve as both practical tools and stylish accents, transforming any desk into a well-lit place of productivity and creativity.

LIGHT THERAPY LAMPS

Light therapy lamps can alleviate ailments ranging from seasonal disruption to sleep disturbances and mood swings. By mimicking natural sunlight, these lamps offer a non-invasive and convenient way to regulate circadian rhythms, elevate mood and restore well-being, especially in the darker months or in environments with limited sunlight.

LIGHT THERAPY LAMPS	38
---------------------	----

UPLIGHTER

Uplighter illuminate rooms with a touch of elegance and ingenuity. They are designed in such a way that they direct the light upwards and emit a soft and diffuse glow that gently emphasizes the ambiance of the room. With their ability to create a harmonious interplay of light and shadow, they provide an they offer an artistic and at the same time functional for any interior.

SMART LAMPS

Biodynamic lighting: source of well-being!

Light acts on the phases of wakefulness and sleep, thus maintaining the circadian rhythm. The active phase starts as soon as the day rises and the rest phase as soon as the night falls. Lighting therefore plays a key role in improving concentration, creativity and performance, particularly through the regulation of melatonin (the hormone that causes sleep). 480 nanometers is precisely the range at which the light perceived by the receptors of the human eye lowers the level of melatonin and the person benefits from the stimulating and soothing effects of the light.

It is in this approach called "human centric lighting", that Unilux has designed its range of app driven lamps (SUNLIGHT, EYELIGHT and TIMELIGHT) which reproduce a lighting close to natural light. They automatically control the colour temperature throughout the day by programming 3 essential stages of a working day: arrival at work, lunch break and end of the day. These exceptional lamps provide the right quality of light at each moment of the day.

Asymmetrical lighting that significantly reduces glare and optimizes illumination of targeted areas. Light therapy mode – promotes well-being and vitality throughout the day, helping to alleviate depressive states, including seasonal affective disorder caused by lack of sunlight. Color temperature adjustment: customize the lighting to suit your needs whether you're relaxing, reading, or working. Mounted with a clamp, this lamp saves desk space and fits easily behind your computer.

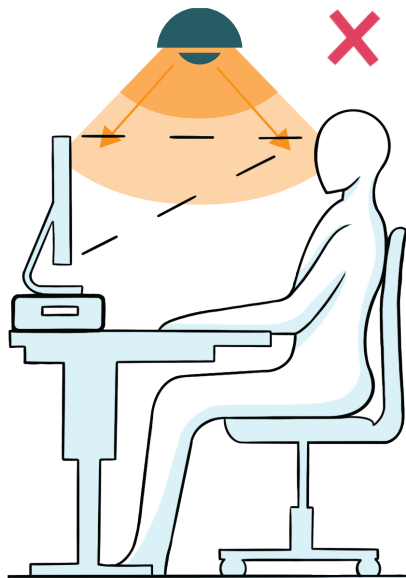

Asymmetrical lighting: reduces eye fatigue!

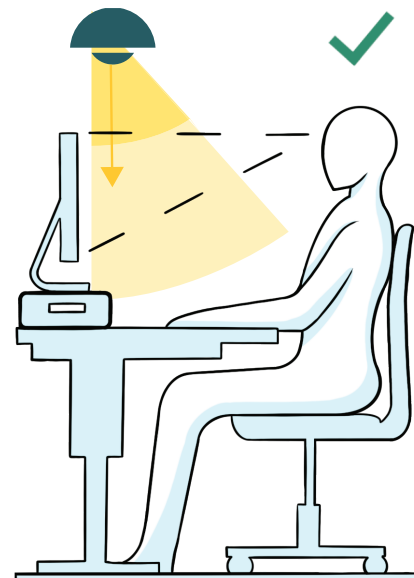

A desk lamp with symmetrical lighting distributes the light evenly over the work surface. This is a huge benefits, especially for larger surfaces.

So, when the eye moves from a brightly lit area to a dark one, the pupil will contract and then dilate and this will cause eye strain that can result in tingling eyes and headaches. To prevent these problems, an asymmetrical lamp is beneficial. It allows the light to be directed with the help of internal reflectors in order to shift the light and illuminate a larger surface. This allows to illuminate the keyboard and work documents in front of the screen without causing reflections or unpleasant glare on the screen while limiting the light contrast that causes eye fatigue.

Symmetrical lighting:

Asymmetrical lighting:

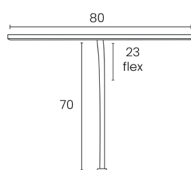

STRATA

Source's lifetime: 50.000 h

TRAVELIGHT will be quickly indispensable during travelling. Lightweight and easy to install: clips onto the computer screen (0.5 to 3 cm thick). Intelligent (variation of intensity and colour temperature). It offers asymmetrical lighting and adapts its light for optimal visual comfort. Connects to a USB port. Carrying case and 5V/1A USB cable included.

DOUBLE JOINTED LAMPS

BAYA BAMBOO

Improve your visual comfort!

Poor lighting quality is one of the sources of discomfort cited by employees. Occupational medicine recommends a minimum of 500 Lux on the work surface according to the NF EN 12-464-1* standard. However, 300 Lux are emitted by ceiling lights in offices and only 34% of the offices reach the 500 Lux lighting level prescribed by the occupational medicine.

Unwanted blinking is generally due to insufficient illumination of your workstation and a poor orientation of the light flow leading to visual disorders. The double arm lamps or „architects“ allow to adjust the light where you want thanks to the great amplitude and flexibility of their double arm. They bring the necessary light complement and provide an excellent diffusion of light on your desk while taking care of your eyes.

* NF EN 12 464-1 (European standard): Requirements for lighting of indoor workplaces

<p>LUMILIGHT</p> <p>Source's lifetime: 25.000 h Lux at 35 cm: 2.300 Material: recycled aluminium 2 years warranty</p>  <p>Black 400 177 869</p>			<p>1.120 lumen (lm)</p> <p>8 W</p> <p>140 lm/W</p> <p>80 CRI</p> <p>3.000 K 6.000 K</p>	<p>The LUMILIGHT desk lamp is a new generation of ergonomic lamp with an innovative design. It offers a wide range of motion thanks to its double joints and provides quality lighting thanks to its large, slender head and textured diffuser. The two touch switches allow to dim the light and adjust the colour temperature continuously.</p> 
<p>PURELINE</p> <p>Source's lifetime: 35.000 h Lux at 35 cm: 2.280 Material: ABS, steel 2 years warranty</p>  <p>Metal grey 400 172 851 White 400 165 091</p>			<p>1.357 lumen (lm)</p> <p>13 W</p> <p>104 lm/W</p> <p>97 CRI</p> <p>3.300 K 4.200 K 5.800 K</p>	<p>PURELINE is distinguished by its slim, clean design. Its head is only 2 cm thick, which gives it an elegant character. Depending on the ambient light of workspace, the lamp adapts its lighting for better visual comfort, thanks to its brightness sensor. Its EYE CARING system will better protect your vision, reducing eye fatigue. 180° rotating head and 150° adjustable arm</p>

DESIGN LAMPS

SOL

Bringing Design to the workspace!

On a desk, lamps are not only used to bring light. They are also decorative objects and, like any other piece of furniture, must be integrated with style into the design of an office space.

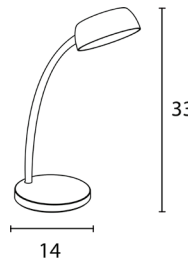

Our carefully finished lamps use quality materials such as metal, wood or glass and offer optimal lighting. Our designers are always looking to create the best combination of aesthetics and functionality.

TAMY

Source's lifetime: 20.000 h
Lux at 35 cm: 840
Material: ABS, metal, rubber
2 years warranty

- Black 400 172 506
- White 400 165 012
- Blue 400 165 017
- Pink 400 165 018
- Green 400 165 015
- Grey 400 165 986

625 lumen (lm)

The small lamp LINKA in pure design offers multiple functions. It offers a 4 colour temperature and 4 intensity levels as well as a touch switch on the base. A very nice feature is the USB port (5 V, 1 A) and a Qi-charger.

Saving space at the workspace

Nowadays, many companies are confronted with a problem of space in their workspaces and many of their employees lack space on their desks. With this in mind, and in order to optimise the workspace, foldable lamps take up a minimum of space on the desk and can be stored in any storage space (drawer, shelf, etc.) once they have been switched off.

LIGHT THERAPY LAMPS

What is light therapy?

Light therapy is a non-medicinal therapy that aims to stimulate the retinal neuroreceptors through exposure to specially designed artificial light to achieve an optimal response. This will activate the secretion of serotonin, the “good mood and activity hormone” to prepare the body for a day full of vitality. The recurrence of the sessions will contribute to the resynchronisation of the biological rhythm and to the improvement of the general condition.

Numerous international studies show that light therapy helps to restore energy, fitness, the ability to concentrate and a good mood. Its action on sleep, seasonal and non-seasonal depression has also been widely demonstrated. Today, light therapy is becoming a recognised therapy and is increasingly used throughout the year.

Benefits and instructions for use

30 minutes of daily exposure, preferably in the morning, allows you to regain energy and a good mood for the whole day, to readjust the day/night cycle in order to have quality sleep, to fight insomnia, to obtain a daily dose of light in case of hospital stay, in Ehpad or working in a confined environment, and to better support jobs with shifting hours or time differences imposed by regular travel.

The first effects are felt very quickly, usually within the first week. Daily practice over a period of at least 4 weeks will ensure optimal results.

In all cases, it is important to read the instructions carefully to get the most out of your light therapy lamp or glasses. In case of eye problems such as glaucoma, cataract or any other medical problem, please consult your doctor to validate the use of a light therapy lamp beforehand.

The majority of Dayvia light therapy lamps and glasses are made in France.

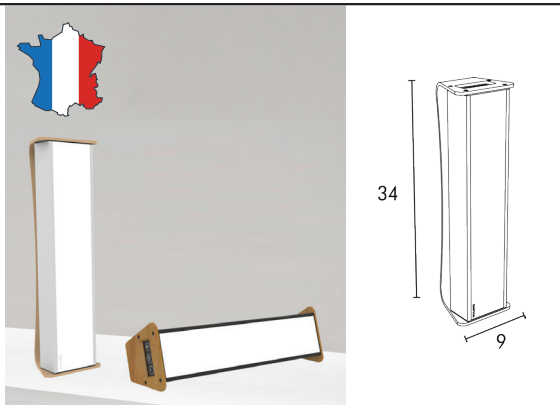

All Dayvia products are certified CE Class I Medical Device

MOBILLY

Class I medical device.
Material: Aluminium, polycarbonate and wood or bamboo.
2 years warranty.

White/beech 400 180 141
Black/bamboo 400 178 700

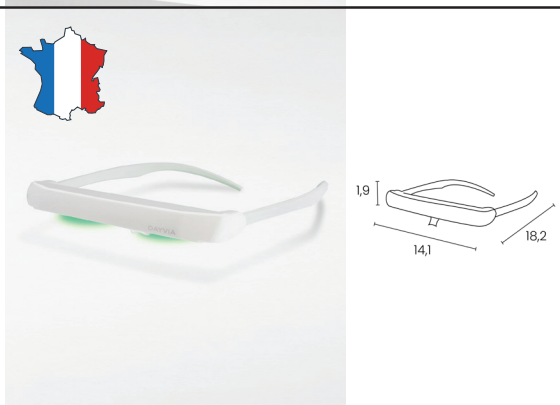

The modern MOBILLY lamp with pure desing brings a trendy touch to any interior. It can be used anymore, as it has a user-friendly handle. It is certified as CE Medical Device and offers two therapeutic lighting modes including the Blue Cyan mode targeted at 480 nm, which is particularly effective. It is available in white/beech or black/bamboo.

SUN ACTIV 2

Class I medical device.
Material: ABS and polypropylene.
2 years warranty.

White 400 159 056

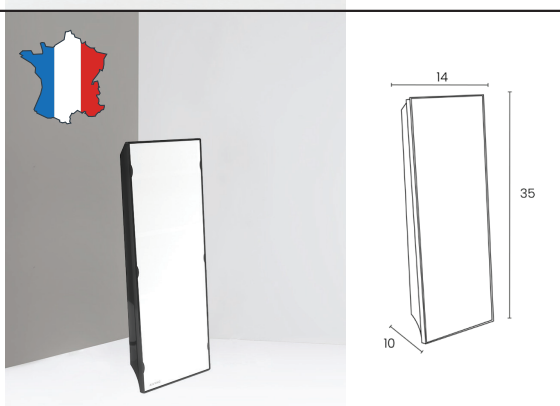

SUN ACTIV 2 is a light and easy to use light therapy device (only 45 g) that you can wear even if you have glasses. With 3 levels of intensity proposed, it is efficient to fight against winter blues, to treat some sleep disorders (early or late phase) and to prepare or recover from a long trip (jet-lag).

SLIM STYLE 3

Class I medical device.
Material: Aluminium, polycarbonate and ABS.
2 years warranty.

Black 400 149 953

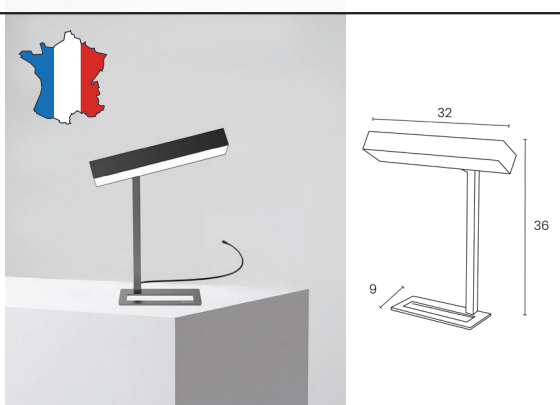

SLIM STYLE 3 is a compact lamp. Depending on the intensity of the lighting chosen and the distance from your eyes, you can make daily sessions of 30 to 60 minutes. Its touch-sensitive keyboard, easy to use and low power consumption (16.5 W) will be arguments in favour of this product.

SUNDESK 3

Class I medical device.
Material: Aluminium, steel and polycarbonate.
2 years warranty.

Black 400 149 954

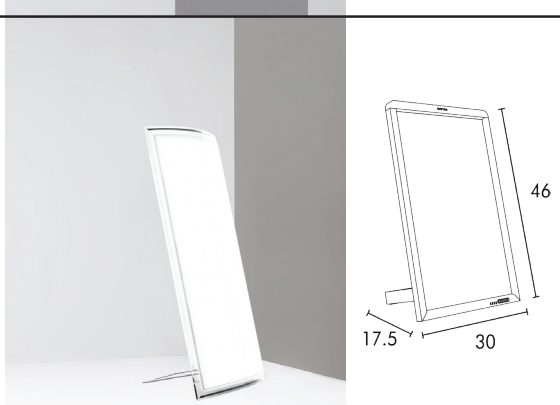

SUNDESK 3 was specially designed for use in the home or office. It can be adjusted by means of a joint: either in light therapy mode, directed towards the face, or in desk lamp mode with a softer white light directed towards the work surface. The combination of two types of Osram LEDs provides optimum and flexible light quality in accordance with the latest lighting recommendations.

WELLBI

Class I medical device.
Material: Aluminium, polycarbonate and steel.
2 years warranty.

White 400 179 590

WELLBI is an easy to use light therapy lamp. It can be easily used at home or in the office. Thanks to its removable foot, it can be placed on surfaced or hung on the wall.

ZELUX is a powerful and flexible LED floor lamp: direct and/or indirect lighting. Elegant and modern design. The ball-and-socket joint system allows the LED modules to be oriented independently and to direct the light according to the users' needs. Each module can be turned completely up or down to obtain direct/indirect lighting, particularly recommended by ergonomists. Dimmer switch on the pole.

LUMILIGHT

UPLIGHTERS WITH DIRECT/INDIRECT LIGHTING

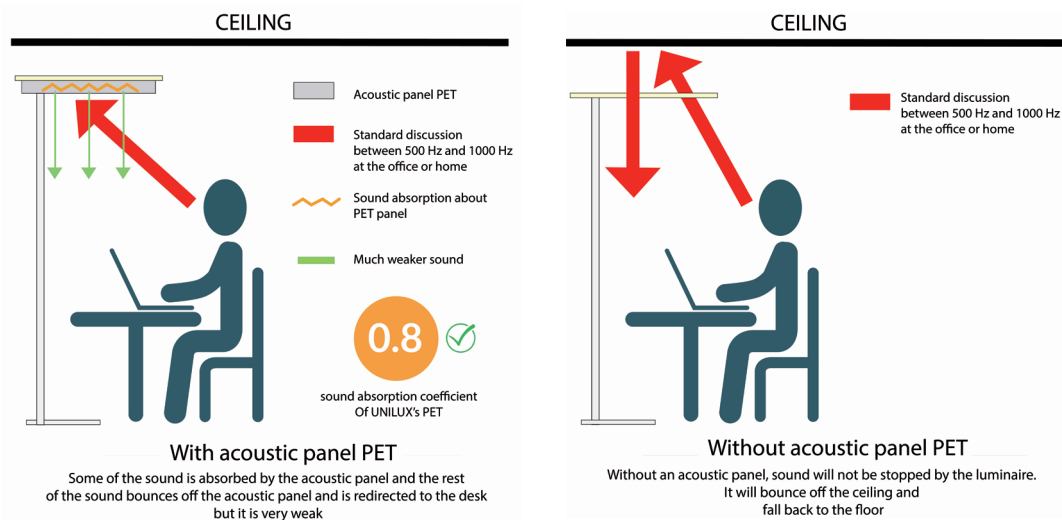

Bright lighting and space on the workspace

Good lighting creates an even and pleasant illumination of a room and does not dazzle.

A desk lamp emits its light into the room or onto the usable area where the light is needed, this is called direct lighting. Direct lighting is used when precise details need to be seen. As a result, no light is wasted and maximum light output is guaranteed. Unfortunately, direct lighting only illuminates a small part of the room and that very strongly. Therefore, it is not beneficial for relaxing the eyes.

Indirect lighting is generated, for example, by an uplighter. Here the cone of light is not directed downwards, rather it is either thrown onto the ceiling or wall and reflected off of it. This light isn't very suitable for concentrated work or reading because it unnecessarily strains the eyes, but it creates a pleasant room atmosphere.

The combination of both types of lighting is therefore recommended, as this lighting is perceived as pleasant.

Touch dimmer switch under the head.

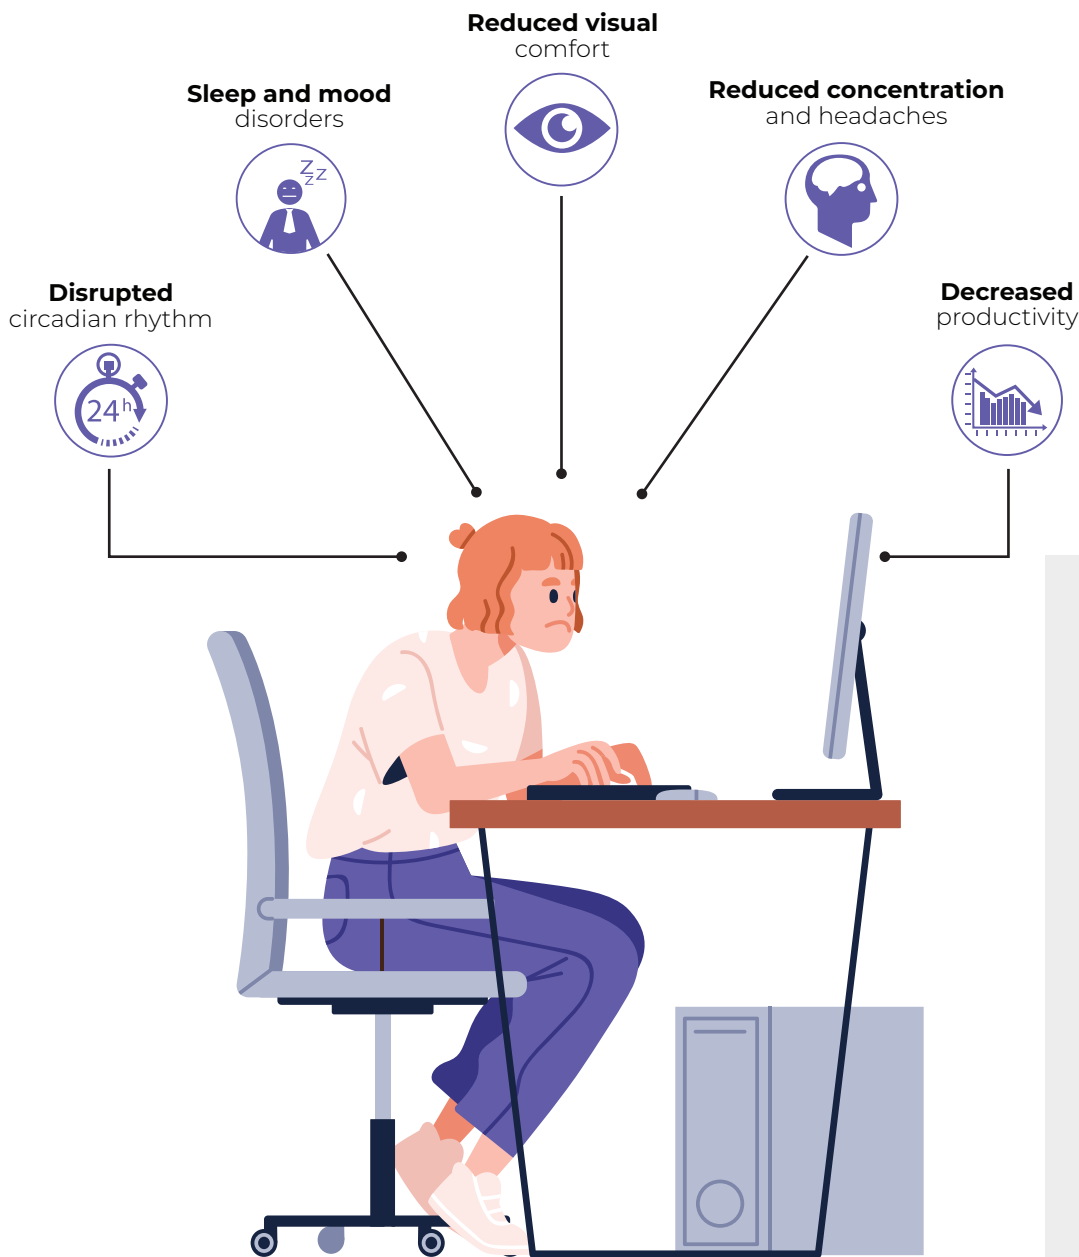

Biodynamic lighting : a source of well-being

Light has a strong influence on our physical and mental behaviour. It affects our concentration, creativity, and therefore our productivity.

In the morning, light is enriched with so-called “blue” wavelengths, which suppress melatonin secretion and help energize you by boosting concentration.

In contrast, at sunset, melatonin production increases thanks to warmer light tones rich in red and orange, helping you relax and fall asleep more easily.

Sleep disorders, mood changes, headaches, and eye fatigue can impact both your professional life and your overall well-being.

Did you know?

34%

of offices reach the recommended illuminance level of 500 lux on the work surface, as advised by occupational health guidelines.

29%

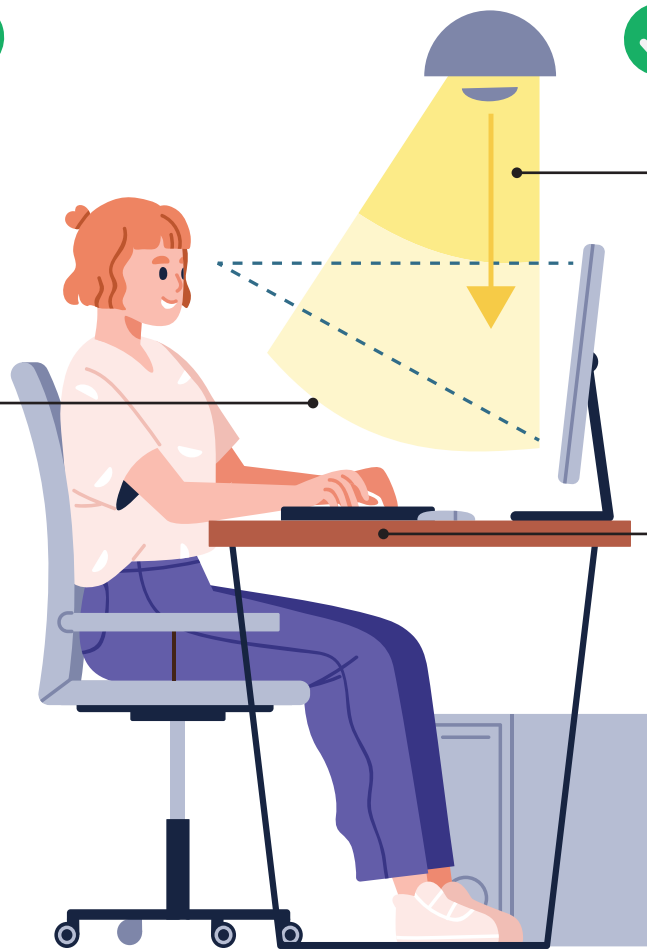

of employees report suffering from eye fatigue.

How to properly **light** your workspace ?

Tip No. 1
Position the lamp head at least 35 cm above the work surface and on the opposite side of your writing hand.

Tip No. 2
Choose asymmetrical lighting, which helps eliminate unwanted reflections on your screen.

Tip No. 3
Avoid reflections on glossy surfaces

Adopting **biodynamic lighting** that supports you throughout the day will help you **perform** better, feel **more energised**, and maintain a **positive mood**.

What is the circadian rhythm ?

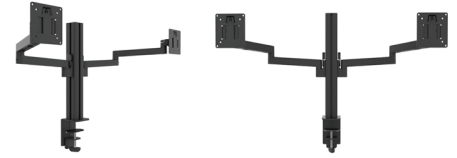

The circadian rhythm is a biological cycle that influences a range of human physiological processes such as cognitive abilities, the sleep-wake cycle, heart rate, mood, memory, and body temperature. It is linked to the Earth's rotation, lasts approximately 24 hours, and is regulated by light, which acts as a natural synchroniser. It is therefore essential to respect natural light, reproduce it as accurately as possible around us, and integrate it into our working environment.

AXIO: A new generation of monitor arms

Much more than a simple monitor arm, the AXIO range offers an innovative solution that combines the prevention of musculoskeletal disorders with the benefits of biodynamic lighting. Its central mast — the true backbone of this monitor arm system — enhances both ergonomics and overall well-being.

ERGONOMIC ACCESSORIES

By designing spaces and workplaces that promote comfort, safety and efficiency, ergonomic principles aim to minimize the risk of physical strain, injury and discomfort. By integrating suitable seating, adjustable workstations and ergonomic accessories, workplaces are intended to increase general well-being and performance so that individuals can work more comfortably and productively.

MSDS : the **leading cause** of occupational illness in France

Musculoskeletal disorders are imbalances affecting the musculoskeletal system. They involve both the upper and lower limbs and include all conditions located in or around the joints: wrists, elbows, shoulders, neck, spine or knees.

In addition, a 37% increase in psychological distress has been observed, closely linked to MSDs. Studies also show that women are more affected than men (55% vs. 45%), particularly after age 45. It is essential to remain vigilant, as these disorders can become exhausting and highly restrictive in daily life.

This shows that workplace ergonomics and well-being have become major priorities for companies.

Did you know?

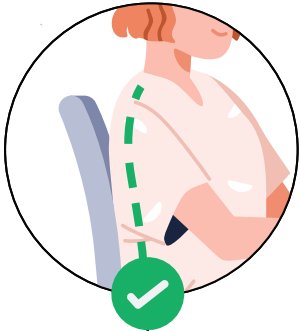

30%

sick leave* are caused by MSDs. This increases staff turnover within companies

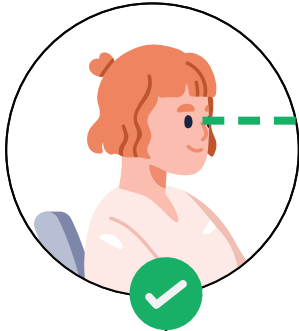

22

millions of workdays* millions of workdays are lost due to MSDs, particularly because of back pain

Aligned back
Maintaining the spine in its natural posture helps prevent lower back pain

Eye-level screen
Reducing visual fatigue and neck strain

Ergonomic chair and dynamic seating
Providing long-lasting comfort to stay focused throughout the day and combat sedentary habits

Adjustable footrest
Keeping your feet flat on the floor or supported by a footrest helps promote healthy blood circulation

Workplace ergonomics :

Workplace ergonomics is essential for enhancing the performance, engagement, and efficiency of your teams. A well-equipped workspace in which you feel comfortable helps strengthen happiness and well-being at work, contributing to greater serenity. Office employees generally spend most of their time seated in front of a computer screen — an average of 8 hours a day for 28 years. Moreover, 8 out of 10 French employees report having already experienced pain.

HOME OFFICE DESK

Due to advancements in technology, which enable effective remote collaboration, a greater emphasis on work-life balance, and the lessons learned during the COVID-19 pandemic the feasibility and benefits of flexible work arrangements are now trending. Hybrid working is a flexible approach to work that combines both remote and in-person elements. In this dynamic setup, employees have the freedom to choose where and when they work, striking a balance between working from a traditional office, home, or other remote locations. Hybrid working harnesses the power of modern technology and communication tools, allowing teams to collaborate effectively and stay connected, regardless of their physical locations. As the business world adapts to the ever-evolving landscape, hybrid working is becoming an integral part of the new normal, providing both employers and employees with greater flexibility and efficiency.

HOMY

Material: steel and chipboard with melamine coating.
2-year warranty.

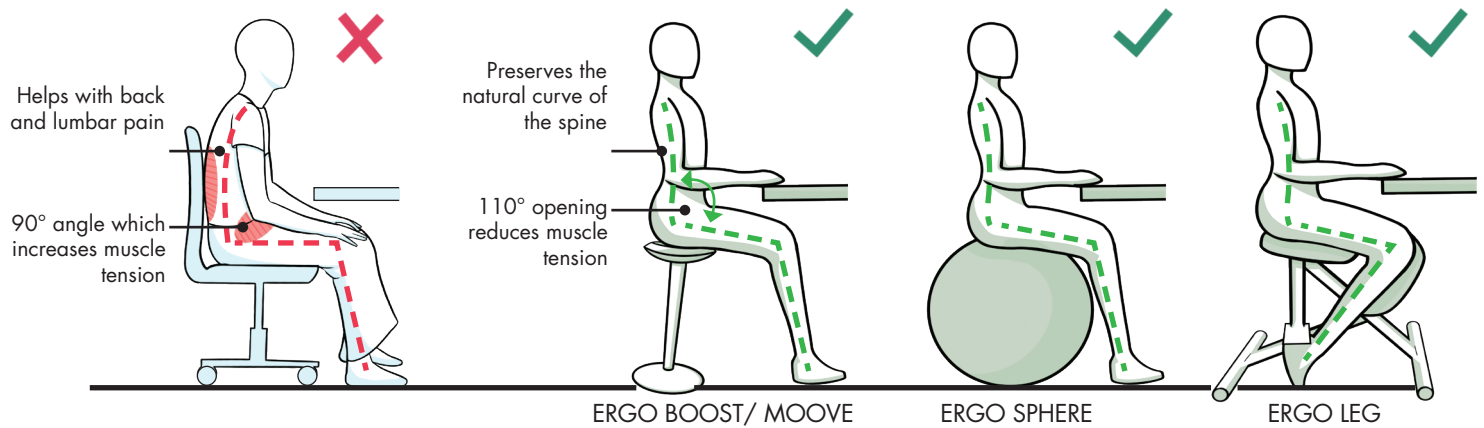

The foldable desk HOMY with its steel frame is ideal for mobile working and small working environments. There is no installation needed, can be used directly. When not in use, it can be folded, make it easy to store and transport.

White/beech 400 165 232

DYNAMIC SEATS

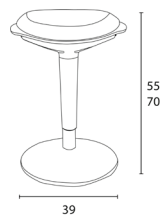

Combating sedentary lifestyles

According to numerous studies, sitting increases the risk of heart problems and reduces life expectancy by 7 years. Indeed, the human body is designed to “move”, not to remain almost immobile for 9 hours a day. In the end, this position disturbs the entire body (less oxygenated) which leads to an increase in fat cells causing potential overweight. To avoid back, lumbar and muscular pains (shoulders, arms, back), dynamic seats are designed to help get a good posture by inducing the tilting of the pelvis and forming an open angle of 110° between thighs and spine thus decreasing the tension exercised on pelvic muscles. This natural posture prevents back pain and improves muscle tone without hindering movements.

ERGO BOOST

Material: steel, ABS, fabric
2 year warranty.

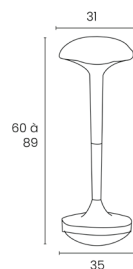

ERGO BOOST promotes dynamic posture while stabilizing movement with its innovative «diamond» base design. This base design allows you to stabilise your position and thus adopt the right posture without hindering your movements. Ideal to avoid back, lumbar and muscle pain (shoulders, arms, back). Thanks to the perfect alignment of the spine, the whole body «benefits».

White 400 165 092

MOOVE

Material, steel, ABS, rubber, fabric
2 years warranty.

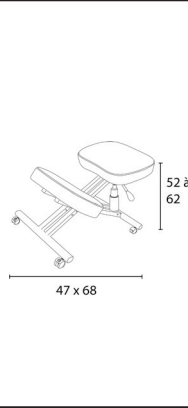

MOOVE favors with its curved foot, a dynamic posture and allows a greater freedom of movement and thus will help you to adopt a good position. It is ideal to avoid back, lumbar and muscular pains (shoulders, arms, back). Thanks to a perfect alignment of the spine, the weight on the pelvis is reduced, the respiratory tract is freed, the sheathing is solicited and the blood circulation is more fluid. In addition, it is proven that sit/stand stools have a positive impact on productivity, creativity and concentration.

Black 400 110 242

ERGONOMIC ACCESSORIES

ERGO LEG

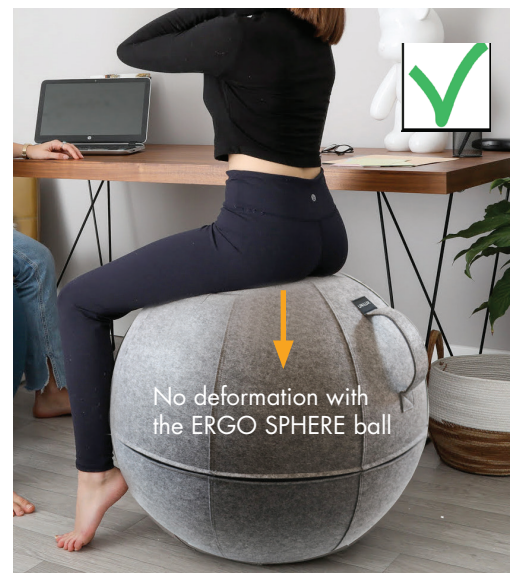

Material: steel, foam, fabric
2 years warranty.

The dynamic seat is made of high density foam covered with a resistant fabric. It has a steel frame and 2 lockable wheels. ERGO LEG is designed to correct posture. The inclination of the seat and the knee rests reduce the pressure on the spine, lumbar region, back, shoulders and neck after several hours of sitting.

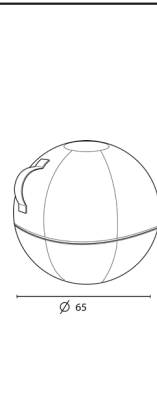

You can manually adjust the angles of this seat (5 levels). It is also possible to adjust the height from 52-62 cm thanks to its hydraulic jack. It will adapt to all morphologies.

Black /metal grey 400 165 094

ERGO SPHERE

Material: rubber, polyester
2 year warranty.

This 65 cm ball is perfectly suited for adults and children between 1.55 and 1.85 m tall and with a maximum weight capacity of 120 kg. ERGO SPHERE is recommended for workers who sit all day, for people who want to improve their posture, for those who want to be active / dynamic even while sitting! But it can also be used for physical activities/exercises like yoga, pilates, gymnastics or fitness. The inner ball is a shatterproof PVC sports ball with a felt cover. The ERGO SPHERE ergonomic seat works the balance and the deep muscles of the abdomen and back, which helps to treat back pain.

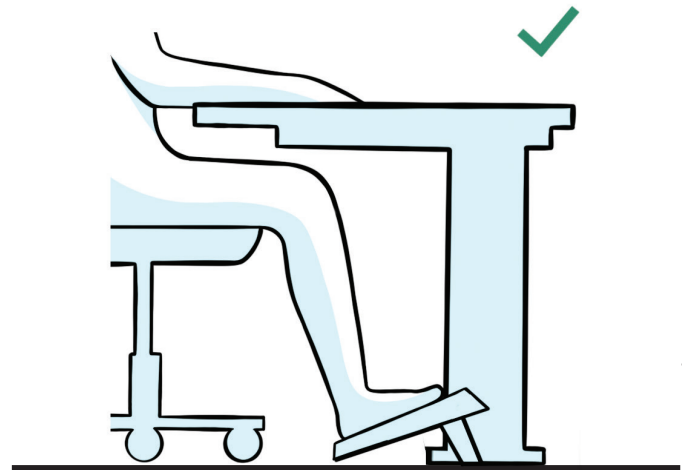

Grey 400 165 093

FOOTRESTS

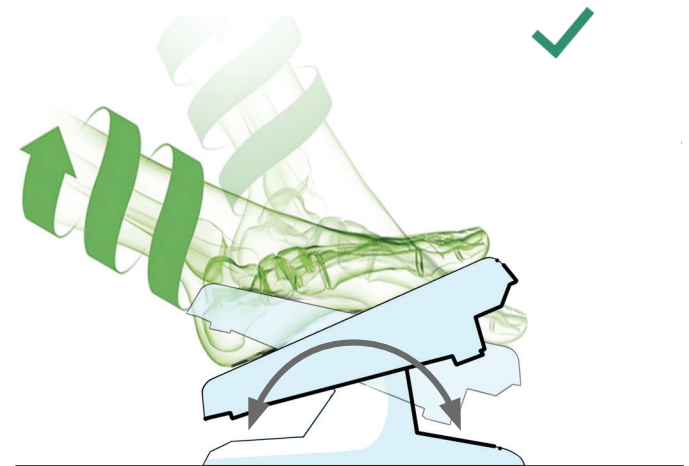

A footrest is not just a matter of convenience; it's a crucial element of creating a healthy and comfortable workspace. While spending long hours at a desk or while enhancing the overall comfort, a footrest is a practical addition that can improve the posture, well-being, and productivity. Therefore, a footrest helps maintain proper ergonomic posture while sitting. It allows to keep the feet flat on the floor, which promotes a more neutral spine position, reducing the risk of back pain and discomfort.

Prolonged sitting can also cause pressure to build up in the legs, leading to discomfort and potential health issues. A footrest encourages circulation by letting shift weight and move legs, reducing the strain on lower limbs. By providing a stable and comfortable surface for the feet, a footrest can help concentrate better on tasks. It minimizes the fidgeting and restlessness that can be distracting when feet dangle or don't have proper support. Another benefits of footrest are the adjustments, allowing to find the perfect height for comfort. This adaptability is especially useful for individuals of various heights or those with different seating preferences. People with conditions like swelling, varicose veins, or edema can benefit from a footrest. Elevating the feet can reduce the pressure and alleviate discomfort associated with these issues. Keeping the feet on a footrest can prevent blood from pooling in lower extremities, reducing the risk of circulatory problems. Good blood flow is essential for overall health.

Maintaining a comfortable posture with a footrest can reduce stress and tension in the lower back and legs. This can have a positive impact on mental and physical well-being.

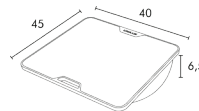

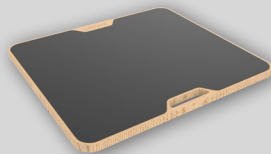

TILTING FOOTRESTS

DYNAMIC FOOTRESTS

BALANCY

Material: FSC wood / rubber
2 year warranty.

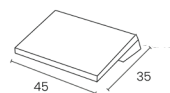

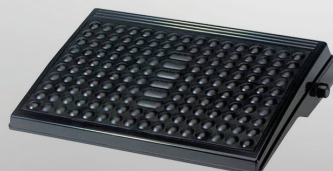

Ideal for combating sedentary habits and encouraging movement.
Versatile use whether seated or standing, depending on your needs.
Certified DIN 4556.
Non-slip surface ensuring perfect stability.

Wood Beech 400 188 804

ORIGIN

Material: ABS, PVC
10-year warranty.

ORIGIN is a footrest that helps to reduce and prevent muscular pain and back fatigue due to poor posture. Promotes blood circulation.
Adjustable in height from 10 to 13.5 cm and in inclination: 10°, 15°.
It adapts to all morphologies. Its anti-allergenic surface made of half-spheres ensures a relaxing massage of the arch of the foot.

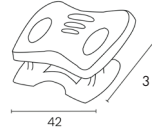

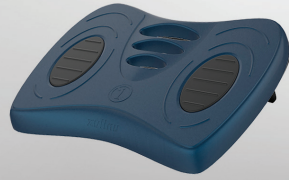

Black 100 340 819

ERGONOMIC ACCESSORIES

CHRYSALIS OCEANIS

Material: recycled PP, ABS, PVC
2-year warranty

■ Blue oceanis 400 179 659

The CHRYSALIS of the Oceanis range is an eco-friendly version of the classic polypropylene CHRYSALIS. Its tray is made of 100% recycled PP manufactured by a Danish factory from the recycling of used fishing nets and fishing ropes. Developed with ergonomists. Prevents muscular pain and back fatigue due to poor posture and promotes blood circulation. Adjustable in inclination: 10°, 15° and 20° thanks to its removable notched feet: adapts to all morphologies. These PVC glides ensure perfect stability.

CHRYSALIS

Material: ABS, PVC
2-year warranty.

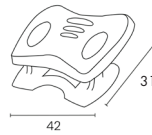

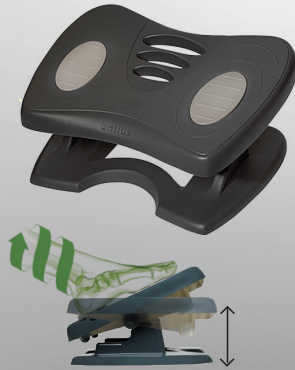

■ Black 100 340 820

NYMPHÉA

Material: PP, PVC
10 years warranty

■ Black 100 340 822

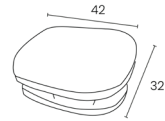

NYMPHEA is a footrest developed with occupational medicine. Helps to avoid muscular pains and back fatigue linked to a bad posture. Promotes blood circulation. Adjustable in height from 12 to 17 cm and inclination from 0° to 20° thanks to its axis system: adapts to all morphologies. Tray equipped with a non-slip support surface to maintain the feet naturally. Base ensuring perfect stability.

CHOCOLATE

Material: PP, PVC
10 years warranty

■ Black 100 340 816

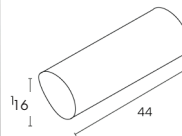

CHOCOLATE prevents muscle pain and back fatigue related to poor posture and promotes blood circulation. Adjustable in height from 10 to 16 cm and in angle from 0° to 25° thanks to its axis system with no screws. Adapts to all morphologies. Tray equipped with a non-slip support surface to support the feet naturally. Base ensuring perfect stability.

ROLLER FEET

Material: PVC, EVA foam
2 years warranty

■ Black 400 125 220

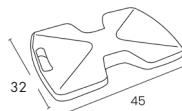

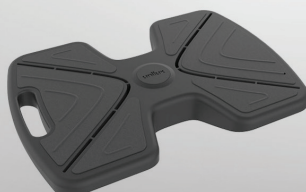

The ROLLER FEET footrest is the first cylindrical footrest allowing you to move your feet back and forth. Its smooth part is ideal to improve your blood circulation. Its multi-dimensional textured surface will allow you to enjoy the benefits of «reflexology» (barefoot use only). It is designed to withstand intensive use. The EVA foam that composes it is very resistant and will not collapse under pressure, and the hollow and rigid cylinder maintains its shape and structure.

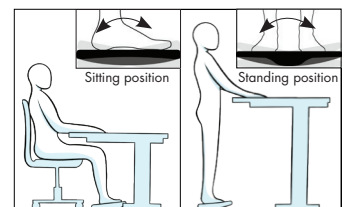

UPDOWN

Material: ABS and silicone
10 years warranty

■ Black 400 095 456

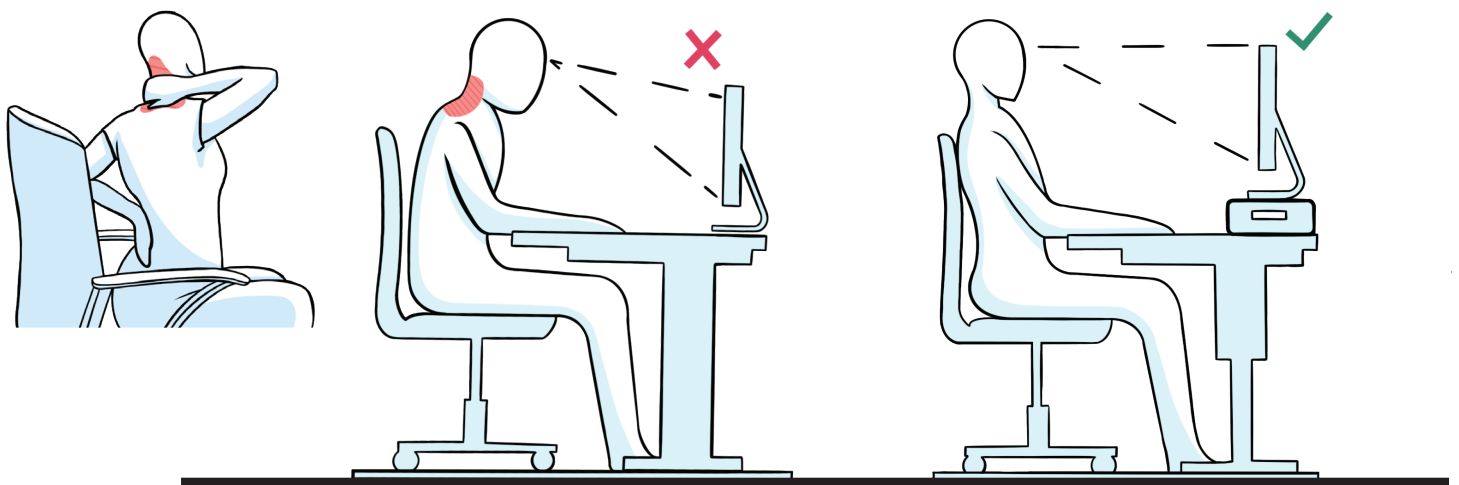

UPDOWN is an ergonomic footrest that can be used while sitting or standing. It improves circulation and reduces fatigue. It can also be used for dynamic exercises during lunch breaks. Easy to carry thanks to its ergonomic handle. Equipped with two anti-slip pads.

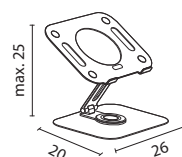

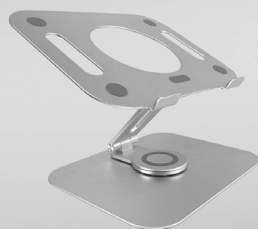

MONITOR & LAPTOP SUPPORT

People use monitor or laptop risers to create a more comfortable, efficient, and ergonomic workspace. These accessories not only enhance productivity and well-being but also contribute to a cleaner and more organized desk environment. A monitor or laptop riser allow to correctly align the eyes with the screen thus prevent RSI by reducing neck strain.

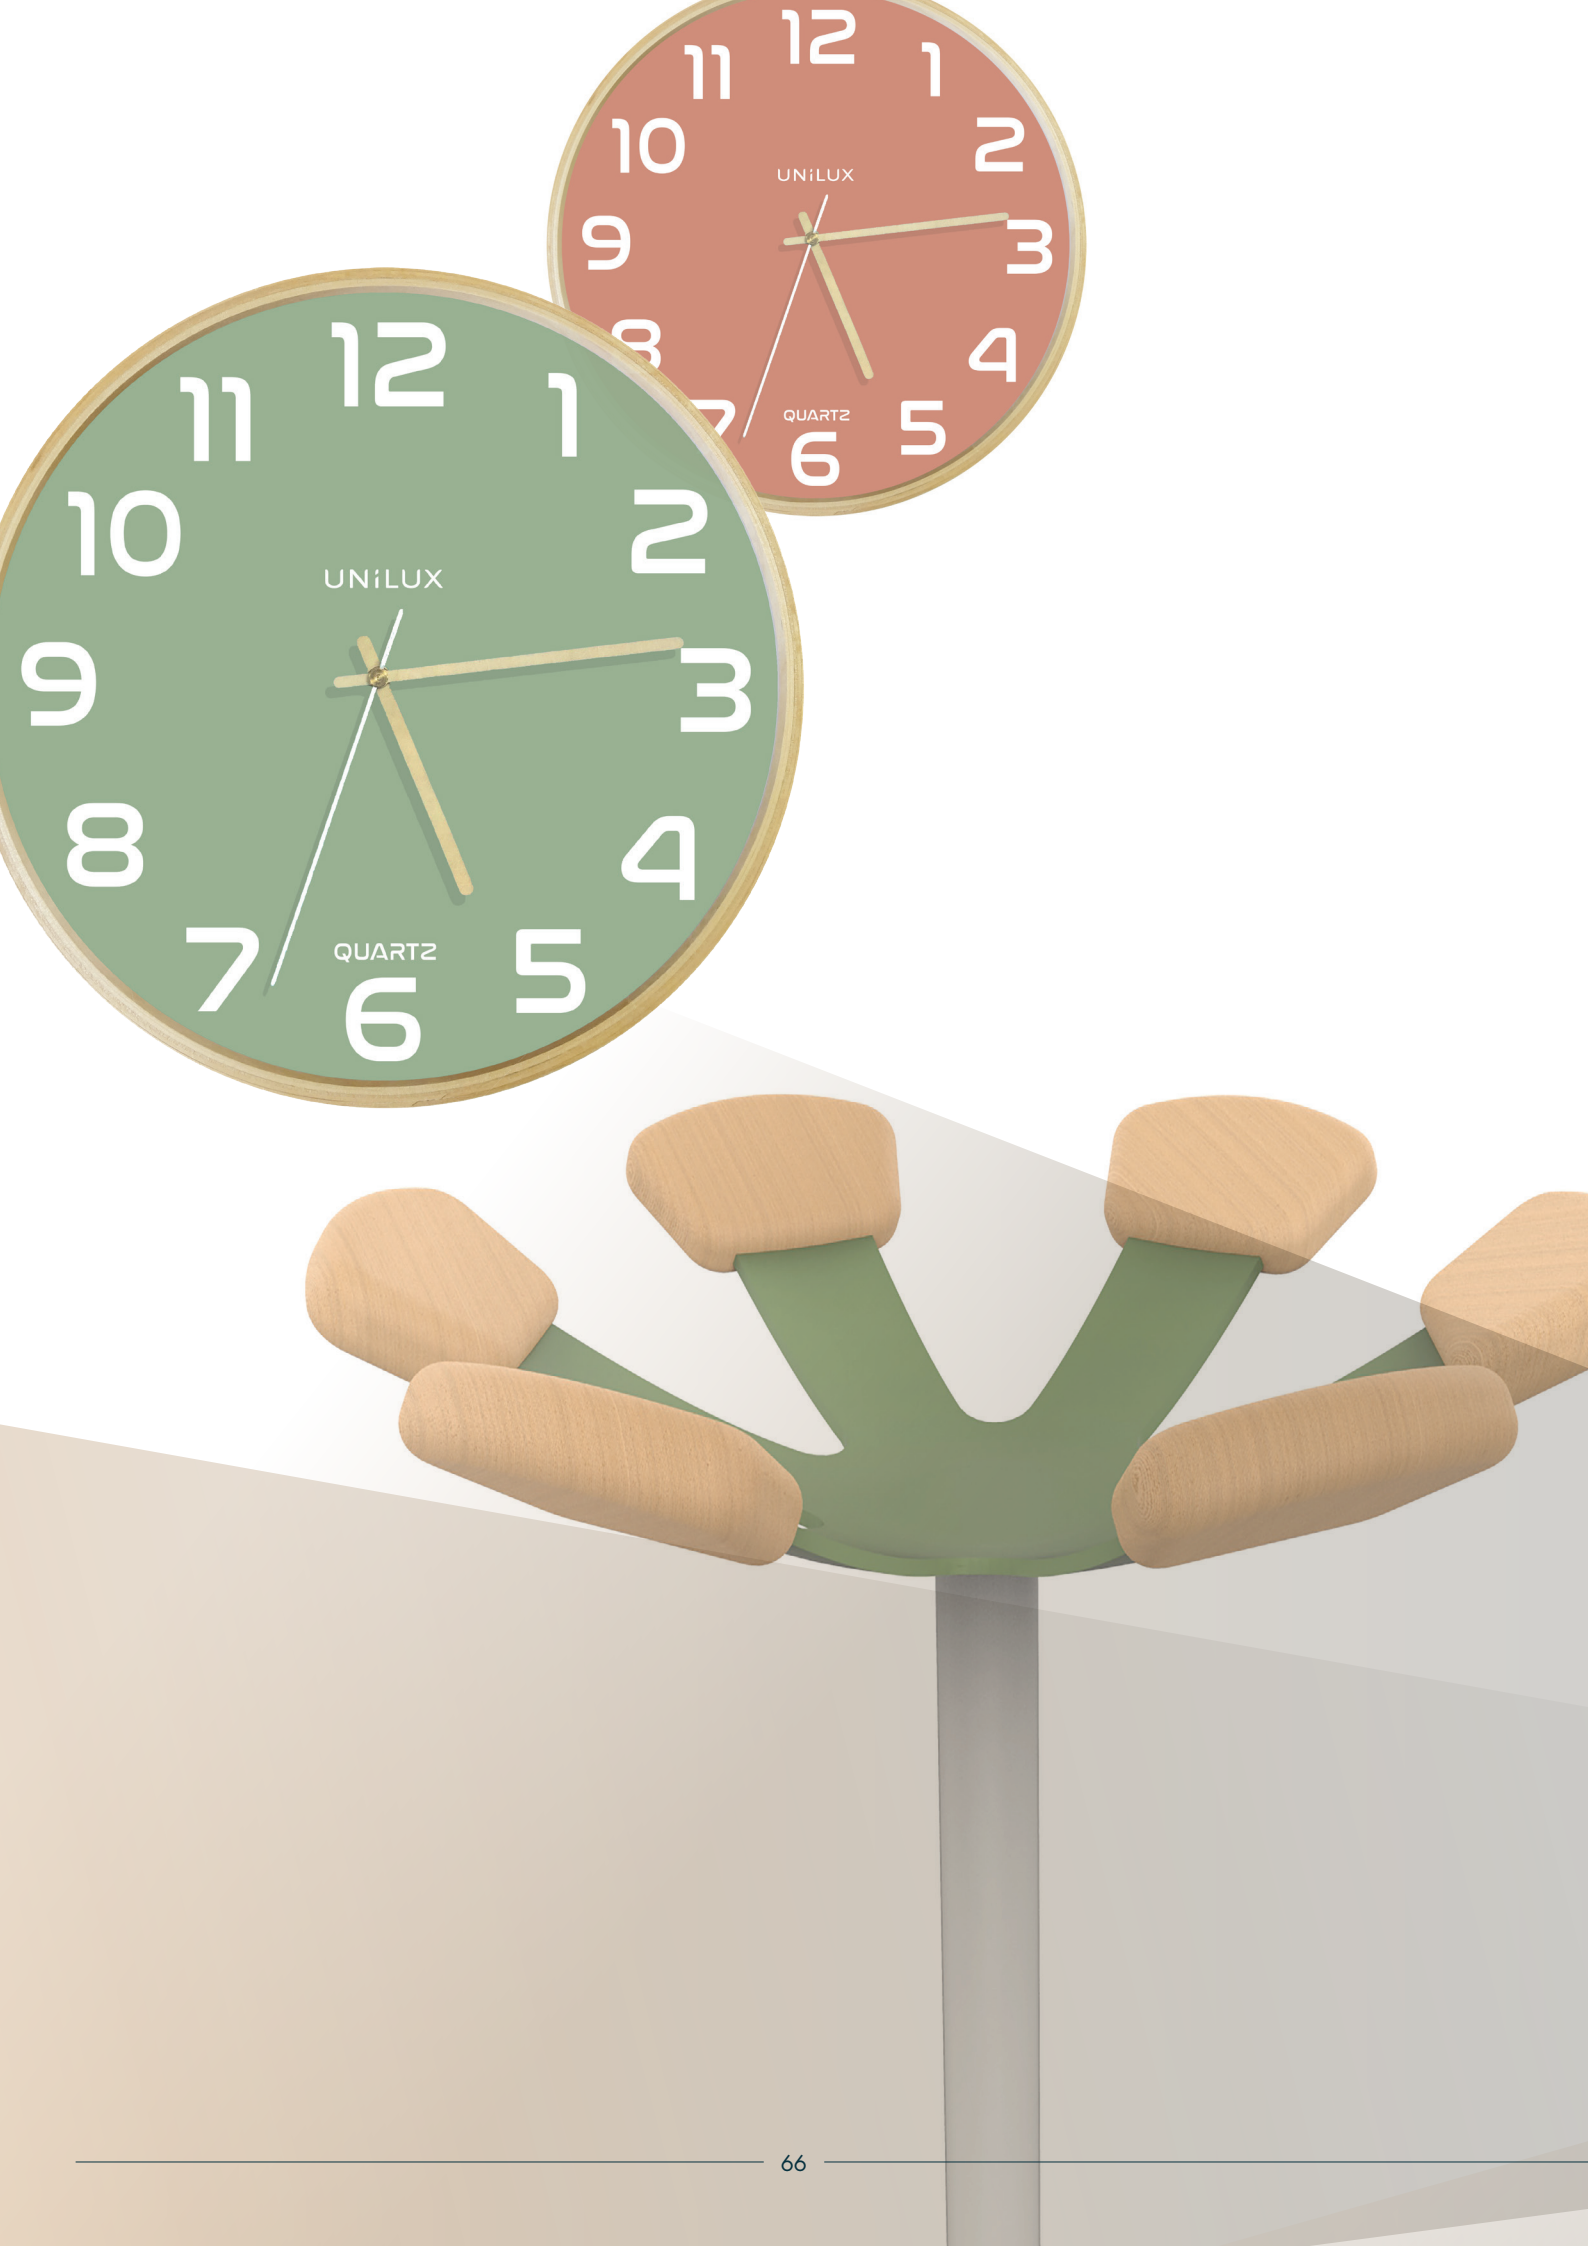

ERGO TOP

Material: recyclable aluminium
2-year warranty

ERGO TOP laptop riser is lightweight, can be folded and is ideal to bring the screen to a comfortable viewing angle. It can be tilted from 0° to 55°. It holds the laptop horizontally and can be rotated.

■ Metal grey 400 153 725

INTERIOR ACCESSORIES

In a modern, changing working world, the distinction between functional and sober office furniture and a comfortable home is becoming increasingly blurred. In times of remote and hybrid working, people work and live more flexible and the classic allocation of furniture to individual living also living areas are becoming one. With this development, the desire for a pleasant, almost homely atmosphere in the workplace is also becoming more important.

CLOCKS

In a changing world of work, the separation between office furniture and a comfortable home is becoming increasingly blurred. With this development, the desire for a warm atmosphere in the workplace is getting popular. Gone are the days when offices were only sober and functional. In addition to ergonomics, the well-being of employees also plays an important role in the modern furnishing of business premises.

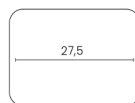

Office furniture and equipment play an important role when attracting new talents. Harmonious furnishing and an orderly environment have a positive effect on our well-being. Furnishing accessories from Unilux help to give companions a permanent place in everyday life.

Very contemporary look thanks to its white numbers on a black background, it dresses with style a wall.</p>

CLOCKS

NUMI

Material: ABS / PMMA.
2 years warranty.

20 m

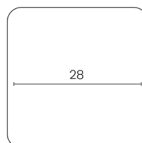

Complete digital display showing time, date and indoor temperature, adjustable via the included remote control. Smart brightness adjustment automatically adapting to ambient light. Excellent readability thanks to high-contrast orange and white LED digits on a black background. Versatile installation on a wall or desk, with mains power cable provided.

Black 400 202 319

FLO LED

Material: plastic outline and glass dial protection.
In plugged.
2 years warranty.

50 m

FLO LED is EED clock connected to the mains: no more batteries to change. It indicates the date and the temperature of the room. Very readable thanks to its 6 high blue numbers, it is also silent.

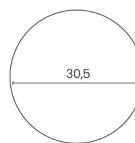

0,28mA

Black 400 124 566

POP

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

30 m

POP is a silent and colourful clock, ideal for large offices or meeting rooms. The second hand does not emit any noise: ideal for well-being and concentration in the office. 4 colours to choose from.

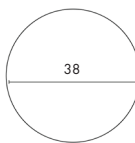

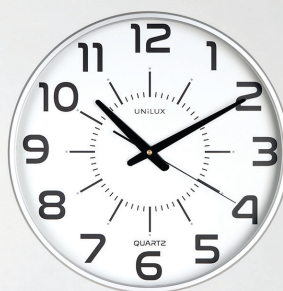

0,22 mA

White 400 094 282
Metal grey 400 094 283
Black 400 094 281
Green 400 094 284

MAXI POP

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

35 m

MAXI POP is a clock specially designed for collective spaces. Silent movement thanks to the second hand not emitting any noise: creates a framework favourable to the concentration and the well-being.

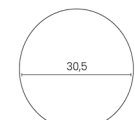

0,88 mA

Metal 400 094 488
Black 400 094 487

POP PL

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

30 m

Silent movement ensuring a calm workspace conducive to concentration. Quartz mechanism delivering consistent, long-lasting precision. High-contrast display guaranteeing optimal readability.

0,20 mA

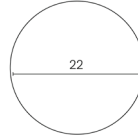

Black 400 190 878

CLOCKS

ATTRACTION

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

22 m

0,28 mA

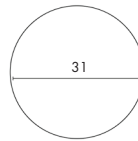

ATTRACTION is a clock to be fixed on cabinets or partitions thanks to its power magnets. It can be fixed without prior installation on all metal surfaces. Very classic and discreet design. Equipped with a high precision quartz system, the mechanism of the clock is based on the phenomenon of piezoelectricity: one of the least energy consuming. Reliability of one second difference in 6 years of operation.
The second hand makes no noise.

■ Metal grey 400 094 404

INSTINCT

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

35 m

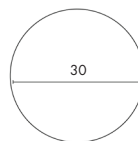

0,14 mA

INSTINCT is a classic and silent clock which finds its place in all types of environment. High precision quartz clock mechanism. Integrated digital date with the possibility of indicating the day/date, date/month, hour/minutes.

■ Metal grey 100 340 853

TEMPUS

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

35 m

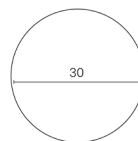

0,21 mA

TEMPUS is a wall clock perfectly adapted to the working world. High precision weather function: The dial of the TEMPUS clock is equipped with a digital thermometer display in degrees C°, allowing you to know the temperature of your working environment in real time with extreme precision. TEMPUS is a classic and modern clock with a design and a grey metal contour that will fit in any decor, from the most classic to the most contemporary.

■ Metal grey 400 094 592

PALMA BAMBOO

Material: bamboo (grass)
Requires 1 AA 1.5V battery (included).
2 years warranty.

35 m

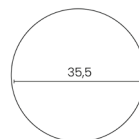

0,20 mA

PALMA BAMBOO is a silent clock in a neo-retro design, with modern lines. Its dial is made of bamboo, 100% natural. It offers a good readability because the absence of protective glass avoids reflections.
Silent second hand for a framework conducive to concentration for work.
High quality Quartz system allows a reliability of 1 second difference in 6 years of operation.

■ Black/bamboo 400 140 806

OUTDOOR - RADIO-CONTROLLED

Material: plastic outline and glass dial protection.
Requires 1 AA 1.5V battery (included).
2 years warranty.

100 m

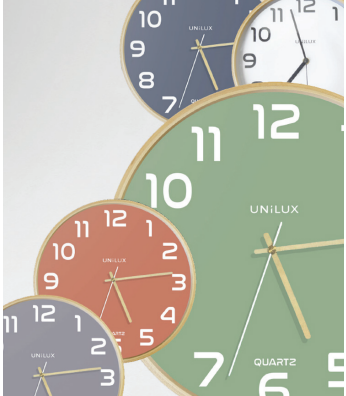

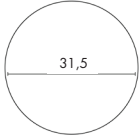

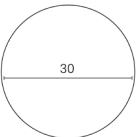

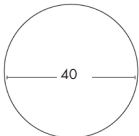

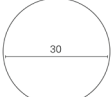

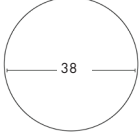

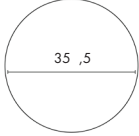

0,22 mA

OUTDOOR is a clock that is suitable for both indoor and outdoor use. It is an intelligent clock that adjusts itself automatically and permanently by radio waves from the atomic clock in Mainzflingen. High precision: 1 second of difference maximum over 1 million years.
Product advantages: waterproof and silent, it is ideal for large indoor or outdoor spaces.
Attention, the radio-controlled clocks do not work in buildings with metal structures.

■ White/steel 400 094 566
